Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. § 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless --

(e) the invention was described in-

- (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effect under this subsection of a national application published under section 122(b) only if the international application designating the United States was published under Article 21(2)(a) of such treaty in the English language; or
- (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that a patent shall not be deemed filed in the United States for the purposes of this subsection based on the filing of an international application filed under the treaty defined in section 351(a).

2. Claims 1 and 4 are rejected under 35 U.S.C. § 102(e) as being anticipated by Payne. (U.S.6,523,937)

Payne (col.4, line 9 – col.5, line 45) discloses the instant claimed method for processing an image in a printer capable of printing a two-color image, comprising the steps of:

setting a primary color and a secondary color as printable colors in the printer (characterized by a primary color and an alternate color);

receiving an original image (characterized by full color image from original image), and producing color difference values associated with the primary color, the secondary color and a white color on an original image pixel-by-pixel basis (characterized by data represent by a primary color, an alternate color, and a

white color characterized by the background color of the print paper; col.4, lines 9-20), and converting a corresponding pixel color of the original image into the primary, secondary or white color associated with a smallest color difference value (it is apparent that with the printer ability it would try to closely match the value of the three color with the full color of the original image).

converting the received original image into a bitmap image before the color converting step is carried out (col.4, lines 59-61).

Allowable Subject Matter

3. Claims 2-3, 5-8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
